## Experience

---

**Bild** **Hyderabad, India**  
*Software Development Engineer* *September 2023 - Present*

- Implemented hotkeys to streamline workflows, reducing repetitive actions and improving efficiency by **60%**
- Migrated multiple global states from **Redux** to **Zustand** for improved state management
- Developed a custom approval flow for **Fortus**, streamlining processes and contributing to an increase in Monthly Recurring Revenue of **\$650**
- Built a modular and reusable search component designed for seamless integration into both web and desktop applications, featuring efficient pagination and custom keyboard navigation to ensure consistent user interaction
- Refactored **10+** components into a shared library, establishing a **common codebase** for web and desktop application, ensuring consistency and enabling smoother collaboration

**GE Healthcare** **Bangalore, India**  
*SDE Intern | Certificate* *May 2022 - July 2022*

- Explored GE software of **Imaging Fabric** to gain familiarity with existing **API** and methods for project purposes
- Created a web page to display **DICOM** images with features like data extraction, image panning, zooming, and rotating for enhanced visualization

## Education

---

**National Institute of Technology, Surat** **2019 - 2023**  
*Bachelor of Technology in Electrical Engineering* *CGPA: 8.05*

## Skills

---

**Languages:** Java, HTML, JavaScript  
**Libraries/Frameworks:** Node.js, Express.js, React, Zustand, Tailwind CSS  
**Developer Tools:** Git, MongoDB  
**Courses:** Data Structure and Algorithms, Object Oriented Programming

## Projects

---

**StockX** | PostgreSQL, Express.js, React, Node.js | [GitHub](#)

- Created a Stock trading playground allowing users to buy and sell listed stocks at market price
- Utilized a third-party API to fetch real-time market prices for each listed stock
- Implemented a visually engaging candlestick graph using the CanvasJs library to display the daily prices of selected stocks over the past few months
- Integrated PostgreSQL database to efficiently store transaction history and user portfolios, ensuring secure and organized data management

**WeText** | MongoDB, Express.js, Node.js, HTML, CSS | [GitHub](#)

- Built a real-time one-to-one web-based chat application enabling users to have private conversations
- Leveraged sockets for efficient real-time and bi-directional event-based communication, ensuring seamless and instant message exchange
- Integrated MongoDB, allowing users to view their past conversations with other users

**Portfolio Site** | React | [GitHub](#) | [Live](#)

- Developed a responsive portfolio website to showcase personal projects and deployed on Vercel platform.

## Achievements

---

- \* Reached a maximum rating of **1910** on leetcode and secured Knight badge
- \* Secured a global rank of **825** out of **23000** participants in leetcode biweekly contest 100
- \* Solved more than **1450** problems on coding platforms like [codeforces](#) and [leetcode](#)
- \* Reached a peak rating of **2000** on [lichess](#) in rapid time format
